

The EV Workplace Roadmap

Three steps to a comprehensive electric vehicle implementation strategy

CHATEAU
ENERGY SOLUTIONS

Step 1: Set Up for Success

Understand what your final destination looks like.

Create a plan that establishes objectives and goals of your EV workplace initiatives. Engage key personnel in this process early on.

Then perform due diligence on all potential target sites followed by a site assessment to determine the capacity and condition of the current electrical infrastructure.

Step 2: Design and Deploy **Plans and Goals become** **achievements.**

Move through the concept stage including the type of EV you will purchase, type and level of charging equipment, and the charging management strategies.

Then design a customized EV program for each site including civil and electrical engineering, network controls, and charging infrastructure.

Finally, install the EVSE with expert program management ensuring it is properly integrated with existing infrastructure.

Step 3: Energize and Optimize **Plug in for sustainable results.**

Perform commissioning and quality control audits on newly installed Electric Vehicle Supply Equipment. Provide safety and sustainability training and data controls.

Continue to optimize your workplace EV fleet with demand response strategies and analytics software to measure and improve your program's success.
